*West Basin – Providing a safe and reliable supply of high-quality water to the communities we serve.*

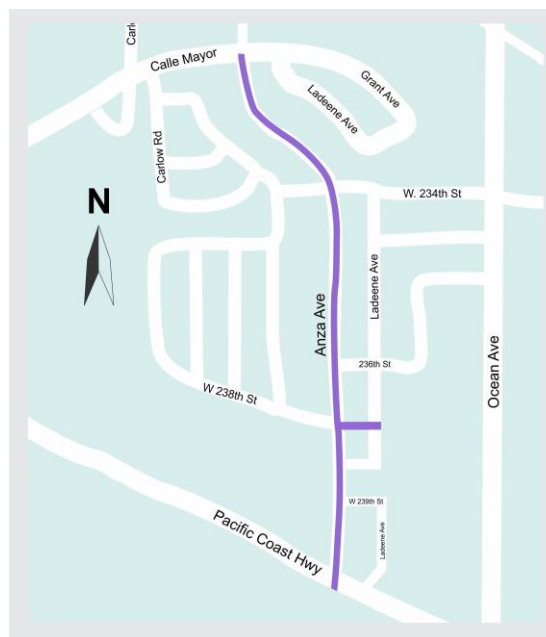

West Basin Municipal Water District is constructing a new recycled water pipeline that will expand recycled water use in the City of Torrance and bring the first drop of recycled water to the Palos Verdes Peninsula.

### What to Expect

Pre-construction activities, including survey work and potholing (boring activity to confirm location of underground utilities), are expected to begin the week of September 25 and continue through October 13.

- Temporary lane closures and parking restrictions required in order to safely conduct the activities; “No Parking” signs posted in advance
- Through-traffic will be maintained at all times
- No disruption to utility and trash services
- Access to driveways and businesses maintained at all times
- Boring locations will be filled with temporary asphalt until final paving of the area

### Location

Work will occur on Anza Avenue between Calle Mayor and PCH (on the northbound side of Anza Avenue), beginning at the intersection of Anza Avenue and Calle Mayor and moving south on Anza Avenue to PCH until each boring location is completed; work will also proceed east on 238<sup>th</sup> Street from Anza Avenue to Ladeene Avenue.

### Background

The Palos Verdes Recycled Water Pipeline Project is a new 3.5-mile-long recycled water pipeline that will connect to West Basin’s existing system at Anza Avenue and Calle Mayor in Torrance and deliver recycled water for irrigation purposes to Lago Seco and Los Arboles “Rocketship” Parks, Richardson Middle School, Riviera Elementary School, medians on PCH and Anza Avenue and the Palos Verdes Golf Club. The project also includes a booster pump station located at Lago Seco Park in Torrance that will store the pumps needed to carry recycled water to higher elevations.
