**West Basin – Providing a safe and reliable supply of high-quality water to the communities we**

West Basin Municipal Water District is constructing a new recycled water pipeline that will expand recycled water use in the City of Torrance and bring the first drop of recycled water to the Palos Verdes Peninsula.

### What to Expect

Project activities include potholing (boring activity to confirm location of underground utilities), open trench construction, excavation, backfill work, deliveries of materials and use of construction equipment.

The work will occur on Via El Sereno at Paseo De Las Tortugas in a private driveway. (See star on map for location.) The pipeline installation will continue south past the driveway to the Palos Verdes/Torrance boundary trail. Once completed, work will continue on the boundary trail and into Palos Verdes Estates.

- Intermittent closure of boundary trail
- Some noise, dust and vibration during work activities
- No disruption to utility, trash or delivery services

### Location

**Work will occur on Via El Sereno at Paseo De Las Tortugas in a private driveway. Pipeline installation will continue south past Via El Sereno to the boundary trail in Palos Verdes Estates.**

### Background

The Palos Verdes Recycled Water Pipeline Project is a new 3.5-mile-long recycled water pipeline that will connect to West Basin’s existing system at Anza Avenue and Calle Mayor in Torrance and deliver recycled water for irrigation purposes to Lago Seco and Los Arboles “Rocketship” Parks, Richardson Middle School, Riviera Elementary School, medians on PCH and Anza Avenue and the Palos Verdes Golf Club. The project also includes a booster pump station located at Lago Seco Park in Torrance that will store the pumps needed to carry recycled water to higher elevations.
