West Basin – Providing a safe and reliable supply of high-quality water to the communities we serve.

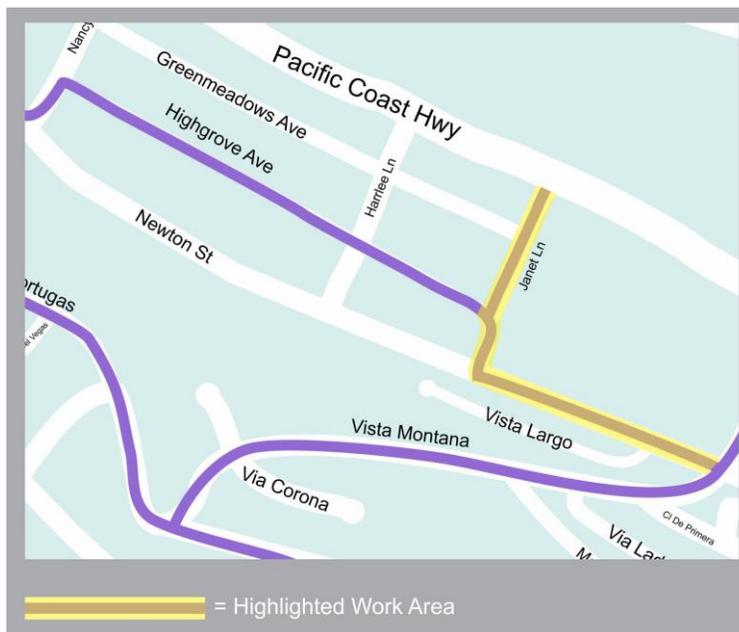

West Basin Municipal Water District is constructing a new recycled water pipeline that will expand recycled water use in the City of Torrance and bring the first drop of recycled water to the Palos Verdes Peninsula.

What to Expect

Project activities include excavation, open trench construction, backfill work, paving, deliveries of materials and use of construction equipment.

- Closure of Janet Lane at frontage road (PCH) through 2/23/24
- Lane closures, parking restrictions and turn restrictions in work areas. “No Parking” signs will be posted in advance.
- Some noise, dust and vibration during work activities
- Through-traffic will be maintained at all times
- No disruption to utility, trash or delivery services

Location

Work will occur on Janet Lane between frontage road (PCH) and Highgrove Avenue; Highgrove Avenue between Janet Lane and Newton Street; Newton Street between Highgrove Avenue/Janet Lane and Vista Montana.

Background

The Palos Verdes Recycled Water Pipeline Project is a new 3.5-mile-long recycled water pipeline that will connect to West Basin’s existing system at Anza Avenue and Calle Mayor in Torrance and deliver recycled water for irrigation purposes to Lago Seco and Los Arboles “Rocketship” Parks, Richardson Middle School, Riviera Elementary School, medians on PCH and Anza Avenue and the Palos Verdes Golf Club. The project also includes a booster pump station located at Lago Seco Park in Torrance that will store the pumps needed to carry recycled water to higher elevations.
