West Basin – Providing a safe and reliable supply of high-quality water to the communities we serve.

West Basin Municipal Water District is constructing a new recycled water pipeline that will expand recycled water use in the City of Torrance and bring the first drop of recycled water to the Palos Verdes Peninsula.

What to Expect

Installation of recycled water pipeline at Lago Seco Park in Torrance will begin May 22 and continue through June 13. Work will occur in the southernmost end of the park that includes the parking lot, cement pad between the parking lot and an unpaved area west of the cement pad.

Project activities include asphalt removal, excavation, open trench construction, backfill work, deliveries of materials and paving.

- Temporary 24-hour closure of the south row of parking spaces in the parking lot; all other parking spaces will remain open
- No access to mulch area during construction work hours
- Access to the community gardens will be available at all times
- Temporary “No Parking” on W. 238th Street between Anza Ave. and Ladeene Ave. during work hours; signs posted in advance
- Some noise, dust and vibration during work activities

Location

Recycled water pipeline will be installed in the south end of Lago Seco Park that includes a portion of the parking lot, as shown by the purple line.

Background

The Palos Verdes Recycled Water Pipeline Project is a new 3.5-mile-long recycled water pipeline that will connect to West Basin’s existing system at Anza Avenue and Calle Mayor in Torrance and deliver recycled water for irrigation purposes to Lago Seco and Los Arboles “Rocketship” Parks, Richardson Middle School, Riviera Elementary School, medians on PCH and Anza Avenue and the Palos Verdes Golf Club. The project also includes a booster pump station located at Lago Seco Park in Torrance that will store the pumps needed to carry recycled water to higher elevations.
