## **WATER HARVEST FESTIVAL SET FOR SATURDAY, OCTOBER 14, IN EL SEGUNDO**

*Free community event focuses on water education and conservation as a way of life*

**CARSON, Calif.** – The West Basin Municipal Water District (West Basin) announced today that it will host the 2023 Water Harvest festival at the Edward C. Little Water Recycling Facility in El Segundo, Calif. on Saturday, October 14, from 10am to 2pm. The free, family-friendly event brings the community together for a fun-filled day of water education and activities.

West Basin water professionals will provide tours of its renowned water recycling facility. Water educators will perform stage shows, and nearly 30 booths will feature local partners. Games, kids costume contest, and opportunity drawings will offer fun prizes to participants. Visit [www.westbasin.org/waterharvest](http://www.westbasin.org/waterharvest) for details and ongoing event updates.

“This year the West Basin Municipal Water District festival celebrates our community members as local water heroes who have demonstrated tremendous efforts to save water during our recent drought, and who continue to build sustainable, water-efficient lifestyles,” said West Basin Board President and Division IV Director Scott Houston. “We invite our service area community members to join the fun at Water Harvest on October 14.”

The schedule of events will include many ways to learn where our water comes from, what local and regional water providers are doing to protect our supply of drinking water, and how people can access resources that help save water and money in the long run.

###

*West Basin Municipal Water District (West Basin) is a wholesale water agency that serves nearly one million people in 17 cities and unincorporated areas in Los Angeles County. West Basin provides imported drinking water, recycled water, as well as conservation and education programs. Through its Water for Tomorrow Program, West Basin is committed to protecting, diversifying, and securing our water supply for the future while continuing a history of innovation and industry leadership.
